

OUR APPROACH TO SUSTAINABILITY

lyondellbasell
Advancing Possible

2030 GOALS

HOW WE'LL DO IT

PLASTIC WASTE

2
million MT

of recycled and renewable-based plastic polymers will be marketed and produced

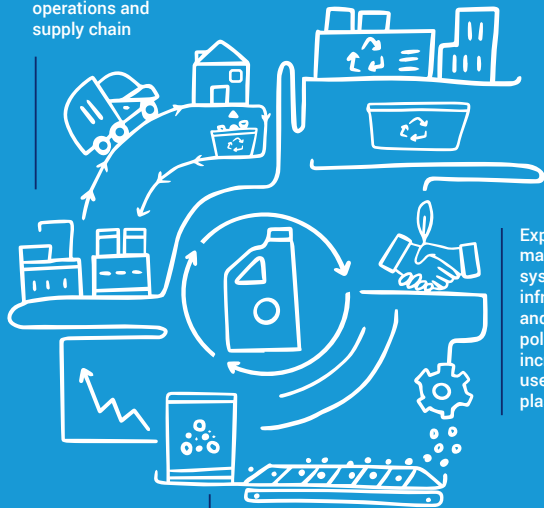

the capital investment will be unlocked following the increase of new recovery and recycling technology and business models

5x

DIVERT
millions

of tons of plastic waste through Alliance to End Plastic Waste projects

Reduce plastic waste in our operations and supply chain

Expand waste management systems and infrastructure, and support policy that increases the use of recycled plastics

Advance mechanical and molecular recycling to meet customers' and brand owners' environmental and circular goals

CLIMATE CHANGE

15%
reduction
in CO2

emissions per ton of product produced

Grow our portfolio of low-carbon products

Increase our use of renewable energy

Use fossil fuels more efficiently and increase use of feedstocks from renewable sources and from plastic waste

THRIVING SOCIETY

ZERO

incidents
injuries
accidents

Build teams that reflect the communities where we operate

Create and retain value in our surrounding neighborhoods

Keep our employees, contractors, customers and neighbors safe

Produce and market products that enable sustainable living
