

Hostalen CRP 100 RD black

A new generation of pipe resins used in drinking water pipe systems

Pipes made of *Hostalen* resins have been effectively transporting water for more than 50 years. Used by our customers for the production of drinking water pipes, LyondellBasell high density polyethylene resins are the industry materials of choice.

Responding to customer needs, LyondellBasell developed *Hostalen CRP 100 RD black*, a PE 100 grade with improved resistance to disinfectants. *Hostalen CRP 100 RD black* pipe resins offers the potential of increased longevity, a key component to water management programs in demanding areas where elevated temperature and stringent disinfectant systems (chlorine based) represent additional challenges to potable water distribution.

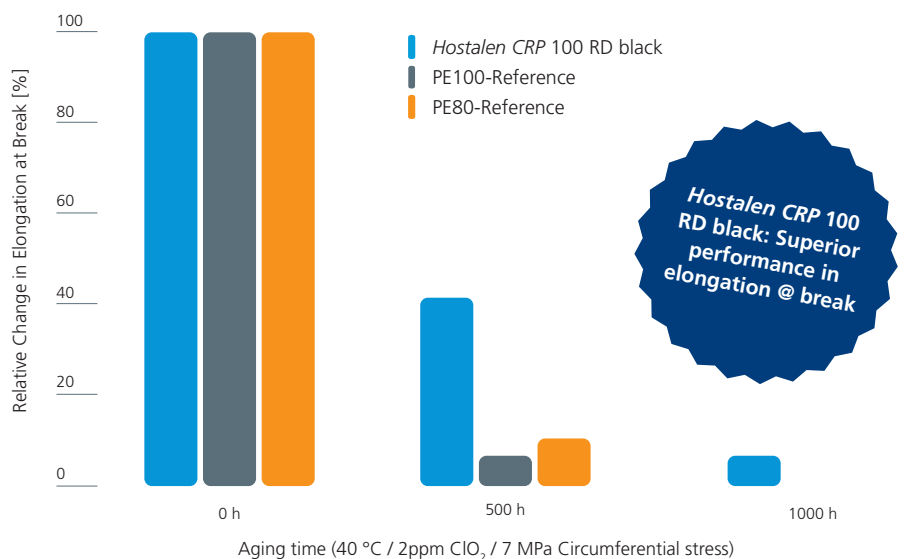

Hostalen CRP 100 RD also contributes to the production of pipe networks with features that include: durability, ease of installation and availability in a wide array of sizes.

Product Benefits

- Improved resistance to chlorinated disinfectants vs. traditional benchmarks PE100 & PE80
- Selected by customers for longer life and lower maintenance costs networks
- Compliance to existing standards for drinking water pipe systems
- Cost-effective solution per meter of pipes
- Manufactured in a world-scale unit with Hostalen ACP technology

NOL ring test after "stressed" aging in ClO₂
