Channelview

- I **4000 acre complex with more than 1800 employees and contractors**
- I **Two olefin units on north side manufactures ethylene, propylene, butadiene and benzene**
- I **South side produces propylene oxide, styrene monomer and other gasoline-blending products**

LyondellBasell's Channelview Complex has been part of the North Channel community since 1957, when it began operations as Texas Butadiene and Chemical Corporation. LyondellBasell combines teams of highly skilled employees with some of the world's finest manufacturing equipment to produce the basic chemical building blocks for goods and products that people use every day. The products include clothing, food packaging, household furnishings, automotive parts, home building materials and gasoline blending products. Whether providing the basic services essential to modern living or improving convenience, our products help enhance the quality of life for people around the world.

Economic Impact

Our site is a major economic contributor to the community by providing skilled jobs, by purchasing millions of dollars in local goods and services and by paying taxes to support local schools and government services.

Community Outreach

Our Channelview Complex management meets regularly with a panel of residents, school officials and local business leaders to discuss the site's environmental and safety performance, community activities, and other concerns and expectations. Our employees volunteer more than 7,000 hours annually in various education, environmental and community activities. The company continues to collaborate with the Harris County Precinct 2 Commissioner by participating in and sponsoring many youth and senior programs. Through LyondellBasell's Explore & Experiment program, our employee volunteers conduct hands-on science learning activities in local school classrooms. Area teachers also have participated in science training workshops to help them use the Explore & Experiment curriculum in the classroom.

Social Responsibility

Our Channelview Complex has been designated a STAR work site in the Voluntary Protection Program by the Occupational Safety and Health Administration (OSHA). This is OSHA's highest level of recognition for safety processes and performance. Our site has consistently been recognized for excellent safety performance by the National Petrochemical and Refiners Association (NPRA). The Texas Chemical Council has awarded the Channelview Complex with a Caring for Texas Award, recognizing exceptional performance in the areas of emergency response, community responsibility and pollution prevention.
