Chocolate Bayou Polymers Plant

- I Produces high-density polyethylene (HDPE) resins
- I Resin used to make plastics for various consumer products
- I Plant maintains OSHA STAR certification

Our Chocolate Bayou Polymers Plant produces high-density polyethylene (HDPE) resins that our customers convert into consumer products. These include plastics for house wares, building materials, automotive parts, food packaging, personal care products, and grocery bags.

Economic Impact

Our site is a major economic engine for the community by providing skilled jobs, by purchasing millions of dollars in local goods and services and by paying taxes to support local schools and government services.

Community Outreach

Our plant management meets with community and industry groups to share plant information and discuss community expectations and concerns as part of a Community Advisory Panel.

Our plant is actively involved in the local community. Employees are encouraged to volunteer their time and resources. They can be found serving as scout leaders, coaches, emergency medical technicians, mentors and board members of other key community and civic organizations.

Employee volunteers also regularly take part in LyondellBasell's annual Global Care Day, a day in which thousands of company volunteers at sites around the globe make a difference by participating in local community service projects. Locally, these projects have involved painting rooms at Kidz Harbor Shelter and constructing an educational nature habitat for use as an outdoor classroom for EC Mason Elementary in Alvin ISD.

Social Responsibility

Because of our dedication to sustainable prosperity, we operate our facilities in a manner that protects people and the environment. Through our culture of Operational Excellence, LyondellBasell companies are committed to continuous improvement in safety and environmental performances. We continuously explore ways to operate our facility in a more energy-efficient manner.

Our Chocolate Bayou Polymers Plant continues to focus on improving safety performance with a goal of an injury-free workplace. Our site continues to maintain OSHA STAR certification as part of its Voluntary Protection Program (VPP). This is OSHA's highest level of recognition for outstanding safety processes and performance in the workplace.

Our plant has received recognition from the American Fuel and Petrochemical Manufacturers for its outstanding safety performance with an Award for Meritorious Safety Performance, a Gold Award, and an Award for Safety Achievement. Also, the Texas Chemical Council has honored the plant with a Caring for Texas Award and a Distinguished Service Award.
