Corpus Christi Complex

- I Site produces ethylene, propylene and other petrochemical products
- I The plant is situated on more than 2,000 acres approximately
- I More than 300 employees and contractors on site

LyondellBasell's Corpus Christi Complex produces ethylene, propylene and other petrochemical products. These are basic chemical building blocks that our customers convert into plastics for consumer products including housewares, home construction materials, automotive parts, food packaging, and personal care products.

Economic Impact

Our site is a major economic engine for Nueces County by providing skilled jobs, purchasing millions of dollars in local goods and services and by paying property taxes to support local schools and government services.

Community Outreach

Site management meets regularly with a panel of community residents to share safety and environmental performance information and to

discuss community expectations and concerns. Our employee volunteers are encouraged to contribute their time and resources and have served numerous local organizations including the Corpus Christi Literacy Council, Robstown Area Development Commission, Boys and Girls Club, American Diabetes Association, Craft Training Center, Coastal Bend Bays Foundation and local school districts. They can be found as emergency responders, Scout leaders, coaches, mentors, teachers, and school board members.

Employee volunteers have also participated in LyondellBasell's annual Global Care Day. The one-day community service initiative encourages company employees around the globe to come together on the same day each year to make a difference by participating in community service projects. Locally, these projects have involved improvements to the Ark Assessment Center and the atriums at Calallen and Tuloso-Midway High Schools.

Social Responsibility

Our commitment as a socially responsible company means that we operate our facilities in a manner that protects people and the environment, in keeping with the principles of Sustainable Development. We demonstrate environmental

responsibility by continuously exploring opportunities to operate our facility in a more energy efficient manner. Additionally, our facility actively seeks alternative uses for waste products through recycle and reuse programs. The Corpus Christi Complex is especially proud of having received the Excellence in Caring for Texas Award from the Texas Chemical Council in recognition of our operational excellence. The site has also been awarded OSHA's prestigious STAR status in that agency's Voluntary Protection Programs in recognition of our strong safety systems.
