Fairport Harbor Plant

- I Produces wire and cable insulating resins
- I Resins used to insulate copper and fiber optic wiring
- I More than 40 employees and contractors on site

LyondellBasell's Fairport Harbor Plant produces wire and cable insulating resins. Products from this site are used by our customers to insulate copper and fiber optic wiring in the automotive and appliance industries. These products add value to our society by making the electrical systems in our cars and home appliances safer and more durable. The site encompasses approximately four acres within the Village of Fairport harbor.

Economic Impact

The site is a significant contributor to the local economy by providing skilled jobs, by purchasing millions of dollars in local goods and services, and by paying taxes to support local schools and government services. The Fairport Harbor Plant has long been an important asset to the community and region.

Community Outreach

Plant management participates in an area community advisory panel in which local industrial managers meet regularly with community leaders to discuss issues of mutual concern. Our employees are encouraged to be actively engaged in the local community and regularly participate in LyondellBasell's annual Global Care Day, a day in which thousands of company volunteers at sites around the globe make a difference by participating in local community service projects. Many of these projects involved making enhancements to Fairport Harbor Village parks, Fairport Harbor school playgrounds, Fairport Harbor Lighthouse Museum and Harding High School baseball fields.

Our employees also open their hearts and wallets to charitable community organizations and contribute generously to the United Way through a payroll pledge campaign.

Social Responsibility

Because of our dedication to sustainable prosperity, we operate our facilities in a manner that protects people and the environment. Through our culture of

Operational Excellence, LyondellBasell companies are committed to continuous improvement in safety and environmental performances. We continuously explore ways to operate our facility in a more energy-efficient manner.

The Fairport Harbor Plant has a long history of working to reduce waste and improve efficiency. We continue to work at applying the waste management principles of recycling and re-use to every aspect of our operations. Since 2007, the environmental team has reduced the amount of waste to the landfill by over 70 percent and continues to strive for new means of waste reduction.
