

Channelview community update

New Channelview complex webpages launch

We're excited to share that LyondellBasell has launched new webpages dedicated to the [Channelview Complex](#). These pages provide a central resource for information on both the North and South Plants, including their history, operations, and ongoing commitment to safety, sustainability and community engagement.

Take a look and you'll find easy-to-access information on community engagement, safety protocols (including emergency services) and environmental programs dedicated to sustainability. It's all designed to help you connect with the Channelview team and stay up to date with ongoing projects, safety initiatives and efforts to reduce environmental impact.

We invite you to visit the new webpages to explore the latest updates, community engagement initiatives and ongoing projects at LyondellBasell Channelview Complex.

The screenshot shows the LyondellBasell website's Channelview Complex page. At the top is the LyondellBasell logo and a navigation menu with items like 'Who we are', 'Our solutions', 'Sustainability', 'Governance', 'Media & insights', and 'Careers'. Below the navigation is a breadcrumb trail: 'LYB \ Locations \ North America \ United States \ Channelview Complex'. The main heading is 'Channelview Complex'. A large image of the industrial facility is shown, partially covered by a white diagonal overlay. Below the image is a horizontal menu with links: 'Channelview Complex', 'Channelview North', 'Channelview South', 'Safety', 'Community', 'Environmental/Sustainability', and 'Newsletter'. The main content area has a light blue background and features the heading 'One complex, dual-site operation - North & South'. Below this is a paragraph of text describing the complex's location, history, and operations. At the bottom, there are two buttons: 'Channelview North' with a right arrow and 'Equistar Chemicals, LP' below it, and 'Channelview South' with a right arrow and 'Lyondell Chemical Company' below it.

CAPLE celebrates 35 years of community conversations

This year marks the 35th anniversary of the Community Advisory Panel to LyondellBasell and Equistar, known as CAPLE, a group built on conversation, trust and community connection. Since 1991, CAPLE has brought together neighbors, local leaders and site representatives to share information, ask questions and discuss topics that matter to east Harris County communities. The milestone year included recognition from Harris County Precinct 3, which presented a proclamation to CAPLE at an April 10 celebration.

For many longtime members, CAPLE meetings have become a familiar and valued space for open dialogue about operations, safety, environmental performance and emergency preparedness at the Channelview Complex. That consistency has helped build understanding and lasting relationships over the years.

CAPLE's success is rooted in the commitment of its volunteer members and community partners who give their time and perspectives to keep the conversation going. As CAPLE celebrates 35 years, we extend a sincere thank you to everyone who has participated along the way.

Community corner

Building roots in Crosby

More than 22 LYB Channelview Complex volunteers planted 30 native trees in Crosby Park enhancing the natural aesthetic and providing additional shade.

Celebrating Channelview FFA

Ten LYB volunteers and two of Channelview Complex fire department vehicles participated in the Channelview High School Future Farmers of America parade in April.

Community corner

Keeping Precinct 2 beautiful

More than 30 LYB Channelview Complex volunteers picked up 20 bags of trash and heavy debris along a one-mile stretch of Sheldon Road on April 24. The effort supports the Channelview Complex Adopt-a-Road commitment with Harris County Precinct 2.

Who we are

The LyondellBasell Channelview Complex is comprised of two sites – Channelview North and Channelview South. Combined, the complex has approximately 2,200 employees and contractors and is one of the company's largest operating sites. Opened in 1957, the site spans nearly 4,000 acres. The raw materials produced at Channelview Complex are used in everyday goods, including automobiles, home furnishings, food packaging, automotive fuels and flexible piping.
